## International Conference in Integrated Management of Environment

September 25-28, 2014 Hammamet - Tunisie

[WWW.ICIME.NET](http://WWW.ICIME.NET)

### Context and Objectives

The pollution caused by human activities are varied and may lead to the destruction of natural habitat and deterioration of the quality of soil, water, air...

The prevention of pollution and the application of the precautionary principle on all potential pollution from human activities is systematic in applying the principles of sustainable development.

It is of course to remedy existing pollution, but also to anticipate and avoid sources of pollution to come, in order to preserve the environment and public health.

In recent years, environmental protection has emerged as a necessity that goes beyond the state borders to reach a global dimension. This awareness has resulted in numerous treaties, directives and conventions.

Protection of the environment considered as one of the pillars of sustainable development is an international priority.

The objective of this conference is to capitalize on the different experiences, studies and research carried out at the international level for the protection and preservation of the environment. This meeting will allow in addition of exchange experiences to develop environmental protection strategies and spatial management tools.

### TOPICS

#### Integrated Management of Environment

The Committee of ICIME program solicits fundamental or applied research papers on the following topics (not exhaustive) :
